

MULTI-LAYER FILTRATION
IN TECHNICAL PERFECTION

bwt MULTI

Butt Multi-layer filters

OUR EXPERTS FOR MOST DIFFICULT WATER PROBLEMS

A natural process

MULTI-LAYER FILTRATION

This method has its origins in nature. Water flows through different layers of filtration materials such as soil, sand, gravel or rocks – and gets purified over the time.

When the water enters a Multi-layer filter the same way an ecosystem naturally purifies the water of particles, turbidity, chemicals, chlorine, taste and smell, heavy metals.

BWT has many years of top experience in process business for industry and municipalities. With BWT Multi series this know-how is now available for domestic use, ready to be installed at the point of entry at your home.

The exact composition of our filter layers, the high quality media and a user- friendly operation, ensures perfectly pure water from every single tap.

KEY BENEFITS

- Efficient and ecological the combination of intelligent control valve and special designed filter media fillings guarantees less waste water
- MADE IN GERMANY
- » Customized fillings with precise matching quantity for all Multi filter types and sizes
- » Compact and slim combination of different filter media ensures multi-purpose treatment
- » Strength and durability FRP pressure vessel with long-lasting material and low weight
- » Extends and protects the life cycle of the Point-of-use water filters
- » Excellent filter media purity, compliant with the strict standards of the German DIN
- » High level of process safety and realible results over their complete period of use
- » Great material resistance that ensures perfect filtering results without adding substances to the water
- » Reliable and proven quality 'Made in Germany'

Butt Multi

A PART OF PERFECT WATER TREATMENT

The Multi series stands for BWT's unmatched quality standards and proven water treatment know-how. Thanks to fully automatic functions, a maximum of removal efficiency and high user-friendliness – they persuade with versatility and reliability for whole house water treatment, installed at the Point-of-Entry of the municipal pipeline. Designed for a broad variety of applications – e.g. for residential houses, appartements, offices, restaurants, bars, shops, etc. and for light commercial sectors.

The hidden champions

FOR SAFE WATER QUALITY

Perfectly clean and hygienic water in your daily contact with water:

In the bathroom, washing hands or face, showering or taking a relaxing bath, brushing teeth, etc.

In your kitchen – washing fruits, cleaning salad or wiping a smeared children's mouth and also extends the life cycle of your undersink water filters.

Multi C – Health and beauty starts with water, free of chlorine. A brilliant product for the well-being of your whole family!

Five types of specialists

DEALING WITH VARIOUS CHALLENGES OF WATER
