

The elegant way to get Magnesium Mineralized Water

A WATER FILTER FOR THE KITCHEN -
THE MODERN KITCHEN AID THAT'S AN ABSOLUTE PLEASURE.

Fresh, Magnesium Mineralized **WATER, DIRECTLY FROM YOUR KITCHEN TAP!**

BWT has made it their business to make every type of water, the best. Available exactly where and when you need it. Undoubtedly, within a household, this would be the kitchen. This is where a family will meet, eat, drink and chat. What is the best ingredient for the most pleasurable drinking and cooking experience? For effective protection against limescale? For health and for the environment? Quite simply, the answer is: Magnesium Mineralized Water. Which now, thanks to BWT AQA drink Pure sets, flows directly from your kitchen tap. Simply open the tap and fill your glass with fresh Magnesium Mineralized Water. Enjoy!

Make your home a 'Bottle Free Zone!'

Our blue planet is unfortunately becoming more of a "Plastic Planet". Anyone who drinks Magnesium Mineralized Water directly from a tap fitted with an AQA drink Pure under-the-sink water filter turns their home into a "Bottle Free Zone" - and thus makes an important contribution to the protection of our environment. If we no longer buy water in plastic bottles - production, storage and environment polluting transport simply disappears. And in the end we are also creating less waste. This way you help contribute towards turning a "Plastic Planet" into „Planet Blue!"

Magnesium Mineralized Water, GET MORE OUT OF YOUR TAP WATER!

+ More flavour with magnesium

The worldwide unique BWT Magnesium Technology makes more out of your water. Taste changing substances such as chlorine, heavy metals and other particles are almost completely filtered out of the water. The water is enriched with the valuable mineral magnesium. The result? Pure Magnesium Mineralized Water that tastes excellent and brings out the flavours of coffee, tea and food to optimum effect.

+ Sip by sip for more vitality

Nutrition experts recommend we drink between two and three litres of water per day. If you cover your daily water needs exclusively with Magnesium Mineralized Water, you are making a contribution towards your daily magnesium requirement. A plus for health, vitality and performance!

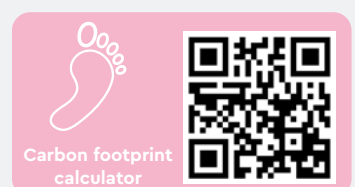

+ Effective limescale protection for your household appliances

The BWT under-the-sink water filter also reduces the calcium content within water. Magnesium Mineralized Water Protect, reliably protects your kitchen appliances such as the coffee maker and kettle, against scale desposits.

+ Sustainable for our environment

Save yourself the task of buying and hauling expensive bottled water! Instead, rely on the clever and environmentally friendly alternative to plastic bottles – Magnesium Mineralized Water, directly from your kitchen tap. With this under the sink solution you play your part in reducing single use plastic bottle waste.

Included in set	-	-	✓	-
Mineralized with magnesium*	✓	✓	✓	✓
Chlorine reduction	✓	✓	✓	✓
Limescale protection	-	-	✓	✓
Ultrafiltration – reduces bacteria and microplastic	-	-	-	-
Capacity in l	1,330 @ 12 °dH	5,000 @ 12 °dH	600 @ 12 °dH	2,100 @ 12 °dH
Height in mm (with wall mounting bracket)	385	500	385	500

*Recommended for water hardness from 5° dH.

The filter for more magnesium - more taste - more power

The AQA drink filter cartridge MP200 has a capacity of 600 l at 12° German hardness. It is equipped with the innovative BWT Magnesium Technology and transforms tap water into Magnesium Mineralized Water in five filtration stages. Odour and taste disturbing substances such as chlorine and heavy metals such as copper, lead or nickel are reduced and the water is enriched with the valuable mineral magnesium. Additionally, it protects kettles and coffee machines from limescale build-up.

The filter exchange indicator - AQA monitor

With the BWT AQA Monitor, a programmable counter unit, you always have the filter capacity at a glance. It is mounted below the sink and connected with the filter via a flow sensor. The filter capacity can be adjusted on the counting unit in relation to the water hardness as well as the runtime of the used filter. The monitor shows the current filter capacity at any time. An acoustic signal indicates, when the filter cartridge must be changed.

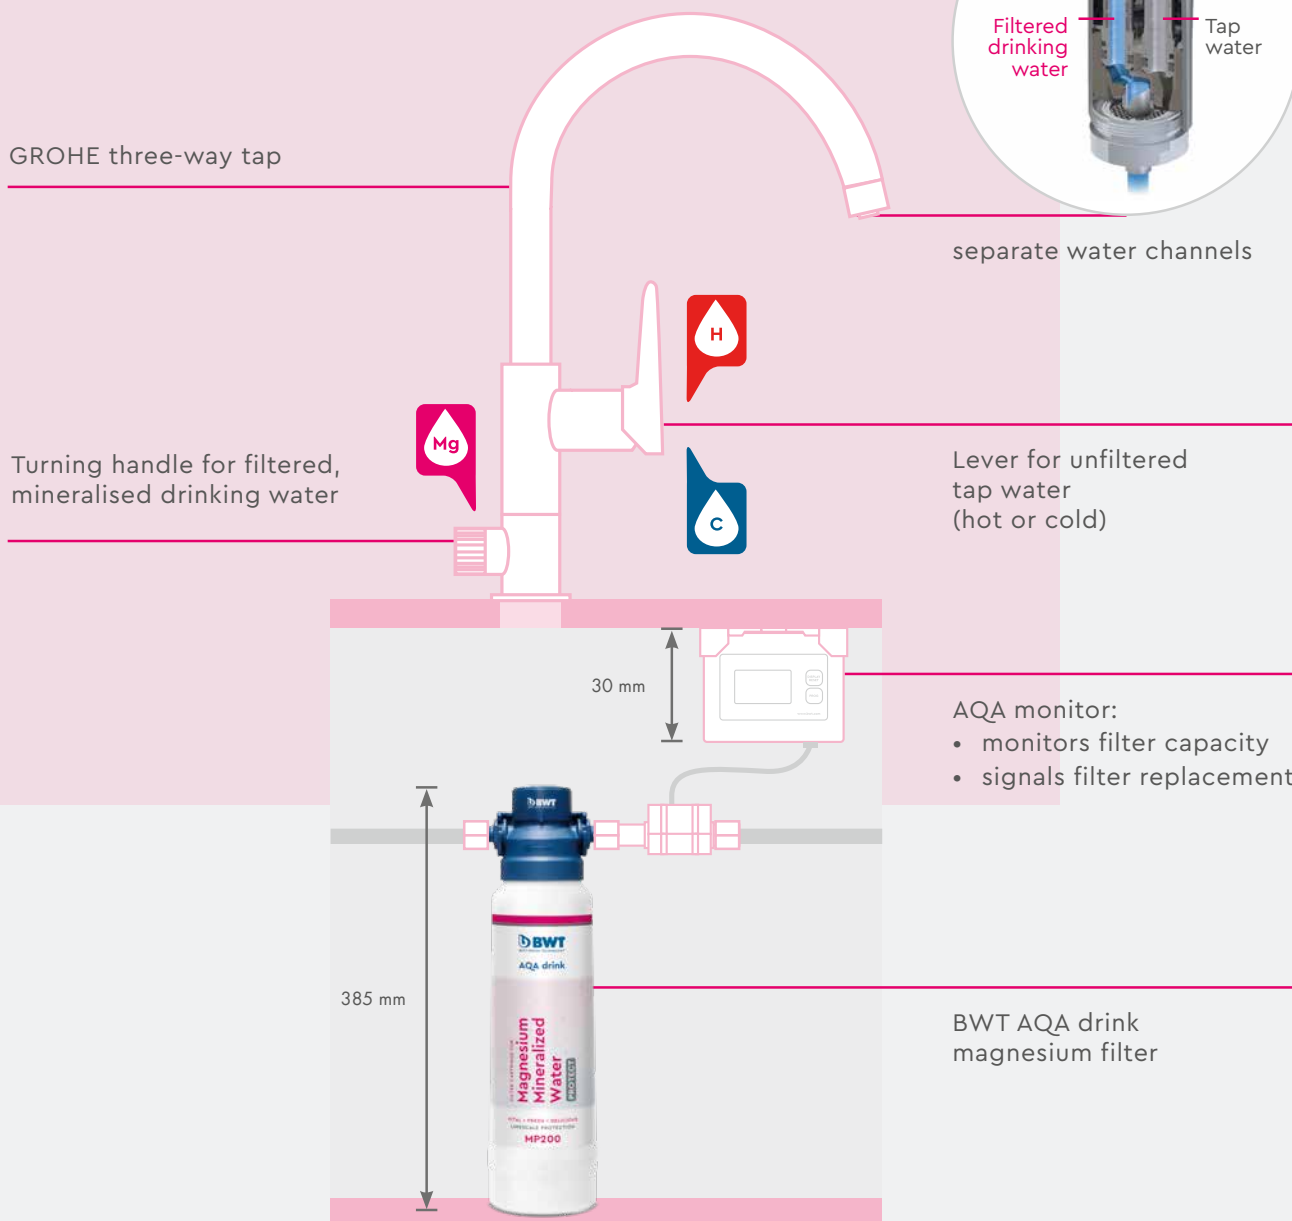

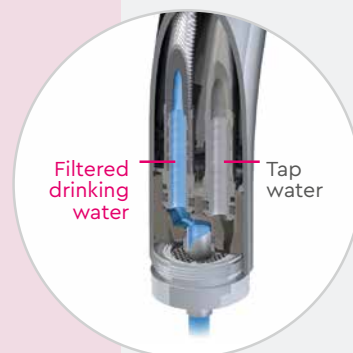

One tap - two water options

The high-quality GROHE fitting is not only a visual highlight in every kitchen, it also contains a lot of technical highlights. Thanks to the separate water channels, you can decide according to your needs, whether you want Magnesium Mineralized Water to drink or whether you need unfiltered tap water - e.g. for washing up. Thus the filter capacity can be ideally used.

MODERN TECHNOLOGY – SIMPLE TO OPERATE

This is how it works!

The BWT AQA drink magnesium filter is installed directly under the sink unit and connected to the water pipe as well as the tap. GROHE's 3 way tap has two levers: one for Magnesium Mineralized Water and one for unfiltered tap water. A programmable counter unit monitors the filter capacity. An acoustic signal indicates, when the filter cartridge must be changed.

Installation in your kitchen:

We don't leave you on your own: a BWT authorized customer service personnel from your vicinity, will install the system in your kitchen in a professional and helpful manner.
