## aquabot K100

A premium Robotic Pool Cleaner designed to make life easier for residential pool owners by providing optimum cleaning of pools of any shape up to 10 m long, compatible with all pool finishes.

### Making life easier for pool owners

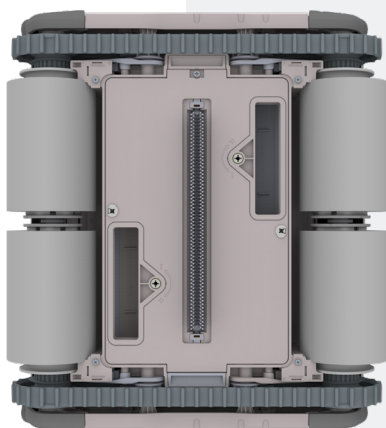

The aquabot K100 was designed to keep residential pools spotlessly clean, taking the drudgery out of pool maintenance so pools owners can simply enjoy their pool. This top-of-the-line Robotic Pool Cleaner comes with a premium, hardwearing premium trolley for convenient transport and storage.

When it's time to clean the pool, the ergonomic design of the aquabot K100 allows it to be picked up and handled effortlessly. After it's done cleaning, the transparent windows make it easy to see if the filters need to be cleaned. The top access filter is easy to remove, simply lift a handle, the filter is released and can be washed without even getting your hands dirty!

### Advanced design & technology for optimum results

Powered by the patented AquaSmart Gyro System, the aquabot K100 uses a smart navigation algorithm to intelligently adapt itself to any residential pool and efficiently clean the pool's floor in a systematic manner, without wasting any time. This, along with its rotating PVA brushes that grip and scrub any surface to remove dirt and debris and its 4D filters, capable of trapping even the tiniest particles, makes the aquabot K100 the ideal choice for the efficient and convenient cleaning of all types of residential pools.

### Efficient and robust

aquabot robotic cleaners are equipped with Breezer technology, an efficient and hardwearing gear transmission; paired with two drive motors and a powerful pump to collect debris, the aquabot K100 is one of the most reliable pool cleaning robots on the market.

### Unmatched suction power

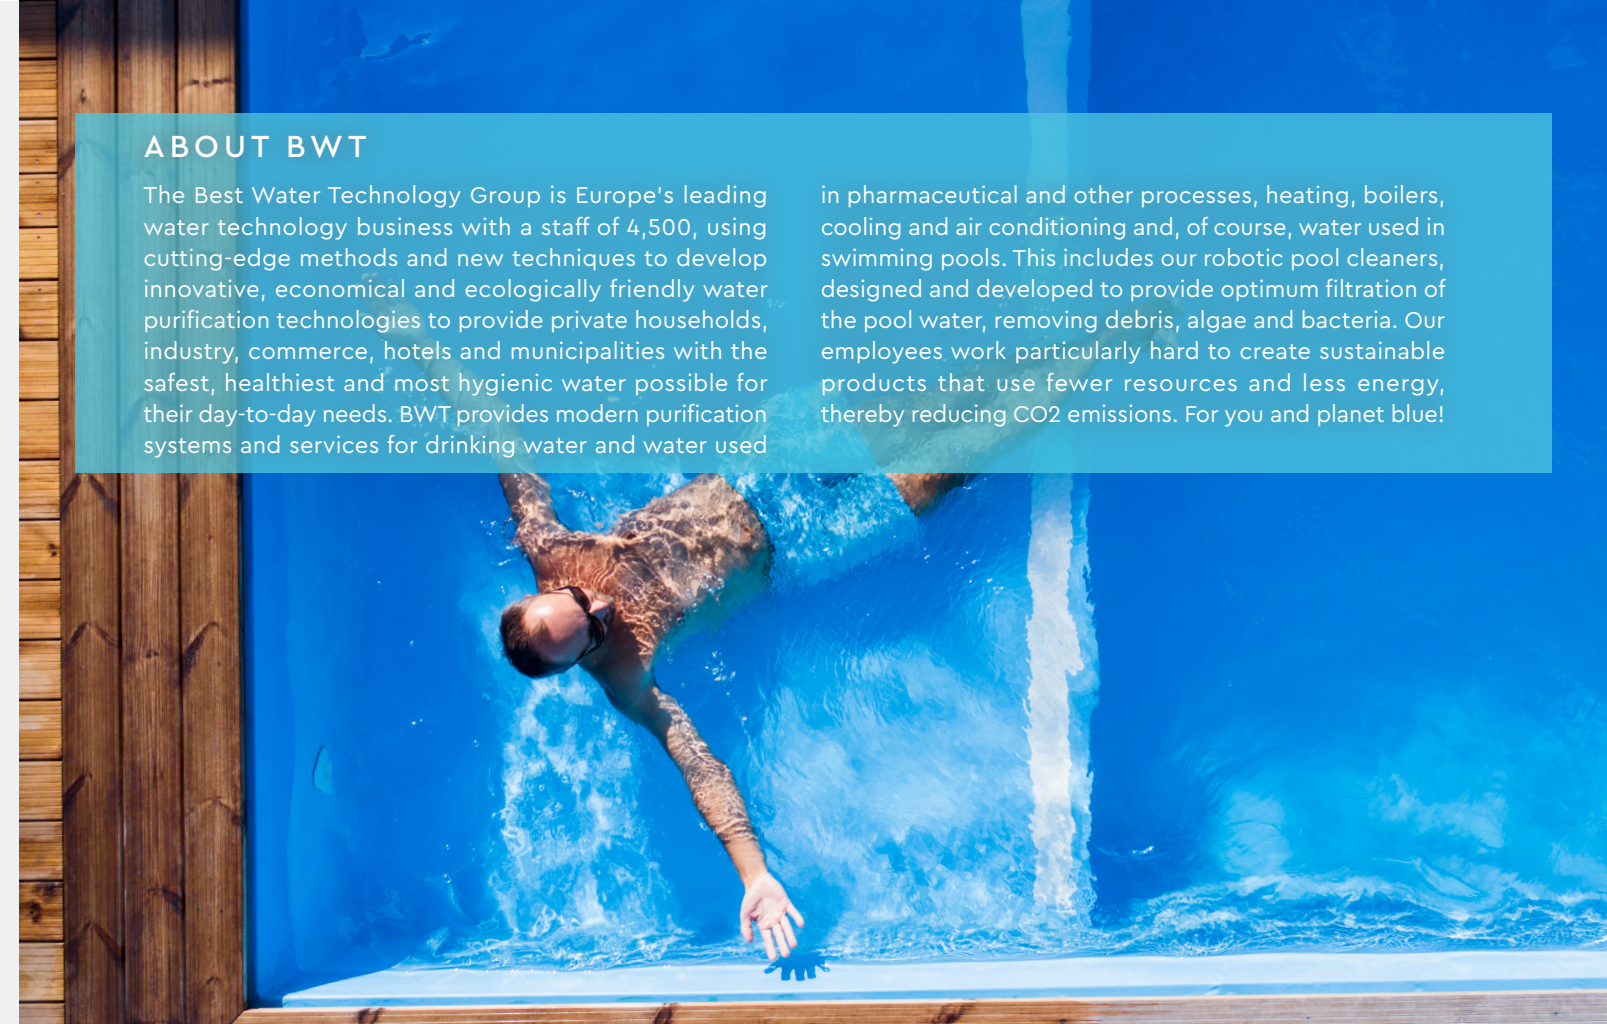

aquabot robotic cleaners feature the most powerful suction of any robot on the market. They can double their suction power through precise adjustment of the intake valves. The closer they are to the surface being vacuumed, the more powerful the suction. Suction can be adjusted to efficiently capture the type of debris to be picked up. Thus, close to a beach for example, they can be set down low to effortlessly pick up every grain of sand.

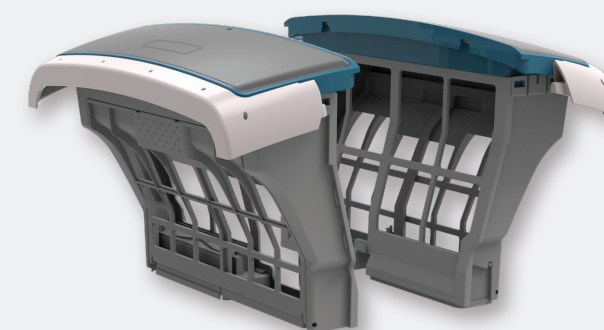

## ABOUT BWT

The Best Water Technology Group is Europe's leading water technology business with a staff of 4,500, using cutting-edge methods and new techniques to develop innovative, economical and ecologically friendly water purification technologies to provide private households, industry, commerce, hotels and municipalities with the safest, healthiest and most hygienic water possible for their day-to-day needs. BWT provides modern purification systems and services for drinking water and water used

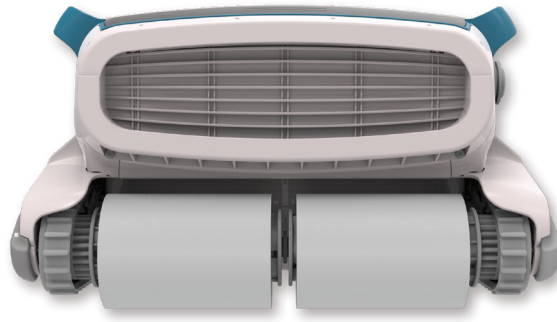

in pharmaceutical and other processes, heating, boilers, cooling and air conditioning and, of course, water used in swimming pools. This includes our robotic pool cleaners, designed and developed to provide optimum filtration of the pool water, removing debris, algae and bacteria. Our employees work particularly hard to create sustainable products that use fewer resources and less energy, thereby reducing CO2 emissions. For you and planet blue!

## TECHNICAL SPECIFICATIONS

Pool dimensions	For pools up to 10m long (all shapes and finishes)
Cleaning type	Floor
Cleaning cycle duration	2 hours
Filter type	4D Hyperfine microfibre filter
Filter access	Easy Top Access, handle
Brushes	4 PVA brushes
Extra brush	Yes, vibrating PVC brush
Navigation algorithm	AquaSmart
Gyroscope system	Yes
Power supply	< 29 Volt, SPS Basic
Power consumption	< 150 Watt
Platform	Dual drive, Breezer technology
Suction flow rate	19 m³/h
Cable length	16m, premium grey
Anti-tangle swivel	Yes
Adjustable intake	Yes, up to twice the suction power
External timer capability	Yes, also compatible with external WiFi timers
Weight	11 kg
Transport/ Storage	Premium trolley
Guarantee	3 years

# *A world made for you!*

EXCELLENCE, INTELLIGENCE, INNOVATION

The BWT world is made for you, and its robotic pool cleaners are designed with you in mind. Don't hesitate, step into an exceptional world.
