

Refreshingly easy: Water at the touch of a button.

In many sectors it's now considered good manners to offer customers and visitors some water as refreshment at the point of sale.

The easiest way to offer fresh water as a service is to install a water dispenser with a fixed mains connection.

In this case it's recommendable to optimize the raw water with filter systems from BWT water+more, which have been conceived for use in water dispensers.

Water, but better!

BWT water+more will refine your mains water with customized filter systems. The result: Perfect taste, maximum protection for your appliances and minimum use of resources.

Regardless of whether you like to drink your water still, cooled, sparkling or hot, BWT water+more filter systems will optimize the mains water so it's just right for your application. In doing so, you'll reduce particles and substances that taint the odour and taste. Your benefits: The highest sensory quality, hygiene and constantly delicious water!

Water Optimization

For water dispenser

BWT besttaste

The enhancer

If the raw water contains what are known as "off-flavours", **BWT besttaste** will be a good choice.

This filter system targets organic elements and chlorine and sieves them out of the water, bringing fresh-ness into the water dispenser.

- » Active carbon filter system with integrated high-performance pre-filtration
- » Reducing particles, off-flavour elements and chlorine
- » Clear water from the beginning
- » High filtrate sensory quality

BWT besthead FLEX

The innovator

- » Refined new connection technology for maximum flexibility
- » EASY Vent flushing valve for easy and reliable purging
- » DVGW-tested check valve on the inlet and outlet
- » Safe filter changes with no water leakage

BWT bestcare

The germ catcher

Water dispensers also need protection from microbes, which the **BWT bestcare** filter system does perfectly. This means it offers high hygiene safety.

- » Hollow fibre membrane filtration retaining 99.9999% (log6/**log5) of bacteria, Legionnaire's and cysts
- » Reduces microplastics
- » Reduces foreign odours and flavours
- » Space-saving and very easy to use

* BWT bestcare S, bestcare Mini ** BWT bestcare 10

Filter capacities overview:

FILTER SYSTEM	CAPACITY	ORDER NO.
BWT besttaste 10	10,000 L	125501409
BWT besttaste 15	40,000 L	125501410
BWT besttaste 20	60,000 L	125252022
BWT bestcare 10	6,000 L/6 months	125501411
BWT bestcare Mini	6,000 L/6 months	FS10B00A00
BWT bestcare S	12,000 L/6 months	FS22B00A00
BWT bestdrink PREMIUM S	2,000 L*	FS22100A00
BWT bestdrink PREMIUM V	5,000 L**	FS23100A00

* 10° carbonate hardness (alkalinity)
** 10° dKH

BWT bestdrink

PREMIUM

The companion

The innovative **BWT bestdrink PREMIUM** filter system with BWT Magnesium Technology ensures balanced mineralization of the water, giving it an incomparable sensory quality and making it a truly pleasurable experience for consumers, sip by sip.

- » Ideal mineralization with magnesium
- » Active carbon fibre for constantly crystal-clear water
- » Changing filters couldn't be easier
- » Can be used horizontally and vertically

BWT besthead

The compact

- » Compact connection technology for the smallest installation situations
- » Specially developed for JG 8 mm connections
- » DVGW-tested check valve on the inlet and outlet
- » Safe filter changes with no water leakage
